RE: S&S Mining Co.  
Red Rock Mine Discharge

Dear Mr. Ruggeri:

This office has not received sufficient information for the S&S Mining Company, Red Rock Uranium Mine wastewater system near LaSal Junction. In addition to the Code of Wastewater Disposal Regulations and the 1977 Colorado River Basin Salinity Control Forum policy which were given to the company in the August predesign meeting, the company must also comply with the enclosed intercepted groundwater policy which was adopted October 20, 1982.

As indicated in the predesign meeting and our September 16, 1982 phone conversation, this office must receive plans and approve any wastewater treatment system or discharge. We request that the company submit information to this office by December 6, 1982 regarding the current operating status of the mine and description of any wastewater system.

Sincerely,

Steven R. McNeal  
Public Health Engineer  
Bureau of Water Pollution Control
